

In hotels, Going Green means saving money.

Save 20-30% in your operating costs per room.

organics**suites** identifies and assists in the implementation of measures to lower operating costs and improve the green building features your property.

Our 6 paths to profit:

1. INCREASE ENERGY EFFICIENCY
2. REDUCE WATER CONSUMPTION
3. IMPROVE INDOOR AIR QUALITY
4. SELECT DURABLE MATERIALS
5. ORIENT TO THE SUN
6. ENHANCE GUEST EXPERIENCES

Simply changing your lightbulbs is not enough. Our process goes far beyond to find ways to reduce your operating costs while increasing your average daily rate and marketability.

Reducing energy use by only 10% equals a \$1.35 increase in Average Daily Rate
